---

# Asset Tokenization: Definition

---

*“Tokenization is the process by which an issuer mints digital tokens (each representing a fraction of an underlying digital or physical asset) on a distributed ledger (i.e., blockchain), guaranteeing transparent and immutable ownership as a result.”*

Source: Boston Consulting Group (2022), “Relevance of on-chain asset tokenization in ‘crypto winter’”

# Asset Tokenization: An enormous opportunity...

...facing challenges to unfold its true potential

1. For example, Insurance policies, Pensions, Alternative Investments; 2 e.g., Infrastructure Projects, Car Fleets, Patents
